

**As a direct result of requests from thousands of exporters throughout the UK, Chambers of Commerce have developed a simple procedure enabling Certificates of Origin to be submitted via the Internet...**

### Apply for Certificates of Origin online

The system, called e-Cert may be accessed direct from your PC and means applications for Certificates of Origin may be submitted directly to your Chamber without even leaving your desk.

**Easier**      **Faster**

**e-Cert**

**Secure**      **Effective**

### Benefits to your company include:

-  Cost Savings (couriers, post, staff time)
-  Website stores common data, which saves re-inputting time
-  Effective communication
-  Speed
-  Professional end product
-  Increased business efficiency

The finished document is exactly the same as you would receive now.  
No charge is made for use of the e-Cert software; the cost is the issuing fee for a Certificate of Origin.

## Case Studies

### **Ferrymoss Ltd, London** **London Chamber of Commerce**

"We are a small business, our offices are within 2 miles of our Chamber.  
...We cannot afford for a member of staff to be out of the office going to the Chamber.  
...We now apply at 3.00 pm knowing that the document will be with us by 9.00 am the next day."

### **R C Treatt & Co Ltd, Suffolk** **Suffolk Chamber of Commerce**

"To us the "e-Cert" system has been a great advantage.  
...Prior to using this system, Certificates of Origin were hand typed and sent to the Chamber via courier. Therefore, time and monies were saved immediately.  
...e-Cert is very efficient, convenient, much faster than hand typing, cost and time effective - no courier charges and certificates are returned promptly."

### **Inco Alloys International Welding Products** **Birmingham Chamber of Commerce**

"It is an extremely quick and efficient way of communicating between our two companies.  
...It saves both time and subsequently costs."

To use e-Cert, you will need to have:

- Internet access
- External email (MS Outlook)

### For further information on e-Cert
