Top 10 Tips on security for your home or business

1. Have a security assessment of your home or business to identify key areas.
2. If you are looking for an intruder alarm decide whether it will be wired or wireless.
3. Will you require Redcare or an alternative monitored system?
4. Will you need to access your alarm system remotely?
5. Ensure key holders can visit property quickly if the alarm is triggered.
6. Consider a service maintenance plan so that your security system is looked after professionally.
7. For CCTV decide on the level of image definition required which will dictate the type of camera supplied.
8. Check the light levels for your camera locations.
9. Where will the recording device be stored, will images be sent off site to the cloud?
10. Inspect all security equipment on a regular basis.

If you're looking for a company with a great reputation for providing a solution for your business and home security, contact Ace Security based in Milton Keynes.
